

A photograph of a modern building's interior, showing a white structural truss system on the left and a wooden-paneled wall on the right. The image is partially obscured by a large white triangle that points towards the top right corner of the page.

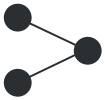

Building great projects together

Public Sector

builtbyitc.com

**We are committed
to delivering a
hassle free project.
Here is how we will
do it:**

Minimum disruption to your day to day operations - You will benefit from logistical solutions that fully consider the need for business continuity.

Your priorities understood and communicated - All site operatives will watch a bespoke video highlighting your expectations and key needs.

Your team will benefit from buildability advice and construction expertise - We will work collaboratively with your professional team and our sub-contractors to ensure that a successful, quality project is delivered.

Clear, honest and open communication - Your project will be assigned an ITC Director to oversee the team and provide you with a direct route of communication via regular meetings.

User friendly operations and maintenance manuals - You will receive a comprehensive manual ahead of practical completion to provide end users with a timely induction period.

You can put your trust in us.

Our business is solidly founded on security and capability, with all operations, systems and teams aligned to ensure consistency of delivery on every project.

Our Projects

ITC has been successfully building great projects for over 25 years; our experience in refurbishment and fit-out means that we know how to create a space that works for you - whether that's a commercial, healthcare, education, leisure, or public sector environment.

We want you to have an exceptional experience working with us, and this starts with us finding out your priorities from the start and ensuring this is communicated throughout the supply chain. We ensure that every environment we construct exceeds your expectations and that your experience working with ITC is second to none.

“ITC have always in my experience been proactive in closing out snagging and do not walk away at Practical Completion. They take real pride in completing a job.”

Building great public sector spaces together

From local councils to emergency service facilities, from healthcare to education environments, we excel in building public sector spaces that are modern, accessible, flexible and comfortable for all who use them.

We have a good understanding of the unique challenges of the public sector. Vivaly, we recognise the importance of working within budgets, meeting completion deadlines, and minimising disruption on live sites.

LBO Camden Crowndale Centre
